

LEYDLINER 4 UNSIZED

Description

We offer a large grammage range from **105 to 280 g/m²**, allowing the use of this grade in numerous markets, eg: general packaging, as well as corrugated.

The **characteristics** of this product are **much higher** than the industry standards and to the generally available performance levels throughout Europe.

This product is particularly adapted to **optimisation**: principally, the reduction of grammage and the number of board grades.

The **appearance** and the **surface characteristics** allow a wide range of applications.

Finally, the corrugator runnability of this product is recognised by our large customer base throughout Europe.

Product Grammage Range & Specification

Nominal	105	110	120	130	170	220	230	250	280
SCT (kN/m)	1.58	1.65	1.80	1.92	2.60	3.40	3.50	3.75	4,2
Burst (kPa)	215	225	240	270	350	450	470	500	560
Mini	105	110	120	130	170	220	230	250	280
SCT (kN/m)	1.53	1.60	1.75	1.87	2.55	3.35	3.45	3.70	4,14
Burst (kPa)	195	205	225	245	325	425	445	475	532

Standard atmospheric laboratory conditions, as specified in : NF EN 20 187
