

Les Papeteries
Emin Leydier

October, 23rd 2009

PRESS RELEASE

Emin Leydier, french leader in paper for corrugated, now certified FSC™.

FSC (Forest Stewardship Council) is an international environmental mark which ensures respect for responsible forest management procedures. These procedures must be economically, environmentally appropriate and socially beneficial.

As far as manufacturing papers for corrugated industry exclusively made of recovered papers and cardboard is concerned, the FSC label certifies the percentage of materials issued from forests managed in a responsible manner.

The Emin Leydier papermills, specialized in the production of recycled corrugated case materials fit perfectly into this approach. With 85 % of their produced volumes FSC guaranteed, they intend, by this new certification, to meet the expectations of their customers, to reduce their environmental impact and to strengthen their image of an eco-industry.

Their two paper mills (Laveyron / Drôme and Nogent-sur-Seine / Aube) have been audited in September 2009 and have now the FSC certificate (control string ID: FCBA-COC-000144).

A recycled paper FSC certified
